CORRECTION Open Access

## Correction to: The effectiveness of Pictorial Representation of Illness and Self Measure (PRISM) for the assessment of the suffering and quality of interpersonal relationships of patients with chronic pain

Mitsunao Tomioka<sup>1\*</sup>, Masako Hosoi<sup>1,2,3</sup>, Tomona Okuzawa<sup>4</sup>, Kozo Anno<sup>2</sup>, Rie Iwaki<sup>2</sup>, Hiroshi Kawata<sup>5</sup>, Chiharu Kubo<sup>6</sup> and Nobuyuki Sudo<sup>1,2,3</sup>

Correction to: BioPsychoSocial Med 15, 22 (2021). https://doi.org/10.1186/s13030-021-00223-0

Following publication of the original article [1], the authors identified an error in Fig. 3 and Table 6.

In the old Fig. 3, there was a layout problem in the upper right part of the figure. The word "tests" in the sentence "7 were fit. But it had completed outpatient PRISM and pain-related tests" was out of the box.

In the old Table 6, eight respondents were shown for the two questions, each person's comment consisted of two comment parts before (T0) and after (T1). The old table cannot distinguish between them. The author put the replaced shapes in the table in the extended metafile so that it wouldn't get out of shape.

The correct figure and table have been included in this correction, and the original article has been corrected.
